features to cover all
local use cases

50%
of carrier integrations exchange
rich data, including 30+ types of
events, in addition to standard
GPS location data

100%
GDPR compliant
platform

1

ONBOARDING AUTOMATION CENTER

Onboard your carriers quickly and painlessly to Shippeo's network

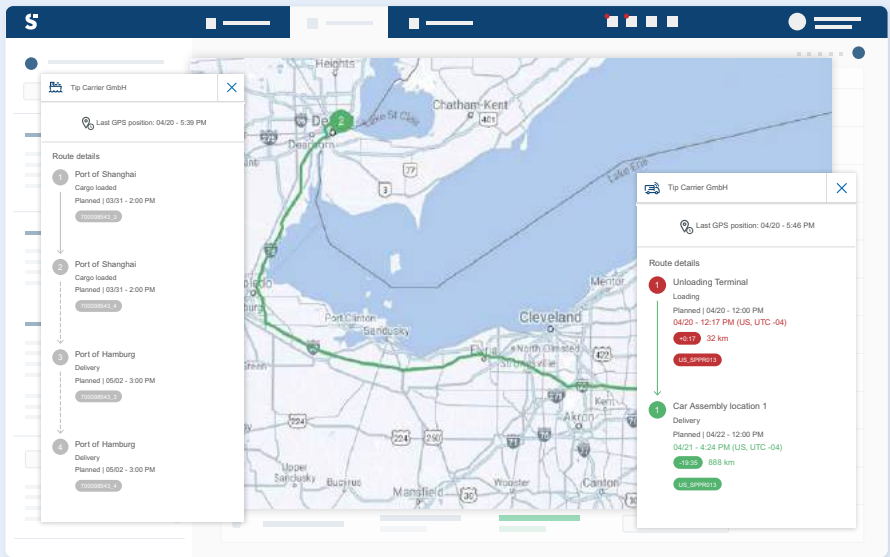

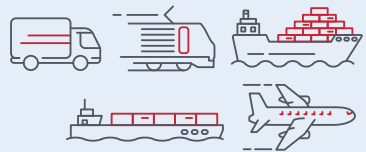

Connect all data sources to aggregate real-time information and surface it within the platform of your choice. Shippeo's unique automated carrier onboarding approach is best in class and has achieved a 98% carrier satisfaction rate by focusing on speed and quality, leveraging our Onboarding Automation Center and providing a dedicated support team.

2

SHIPPER VISIBILITY

Anticipate delays with our best-in-market proprietary ETA algorithm

Shippeo's proprietary ETA algorithm uses machine learning for exceptional accuracy and allows you to quickly anticipate problems across road, rail, ocean, barge and air flows. Predictions help you efficiently manage exceptions and mitigate their impact.

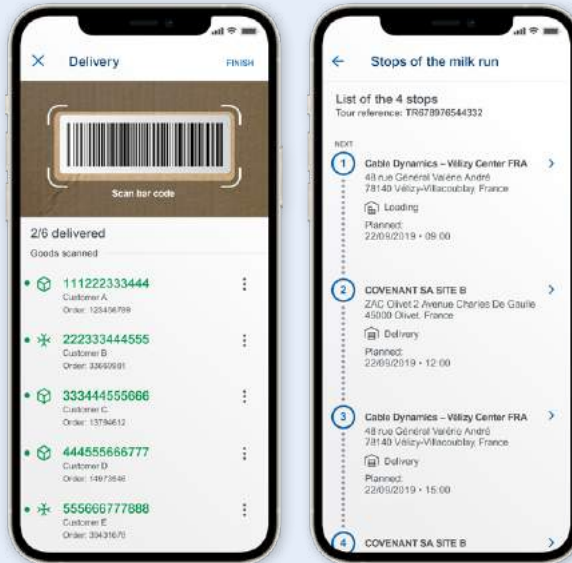

3

PAPERLESS VISIBILITY

Collaborate on your deliveries with digital visibility tools for drivers

Instantly extend your real-time tracking network and eliminate visibility gaps caused by trucks without telematics by providing drivers with Shippeo's mobile app. Use the barcode scanner for more granular parcel and LTL groupage tracking.

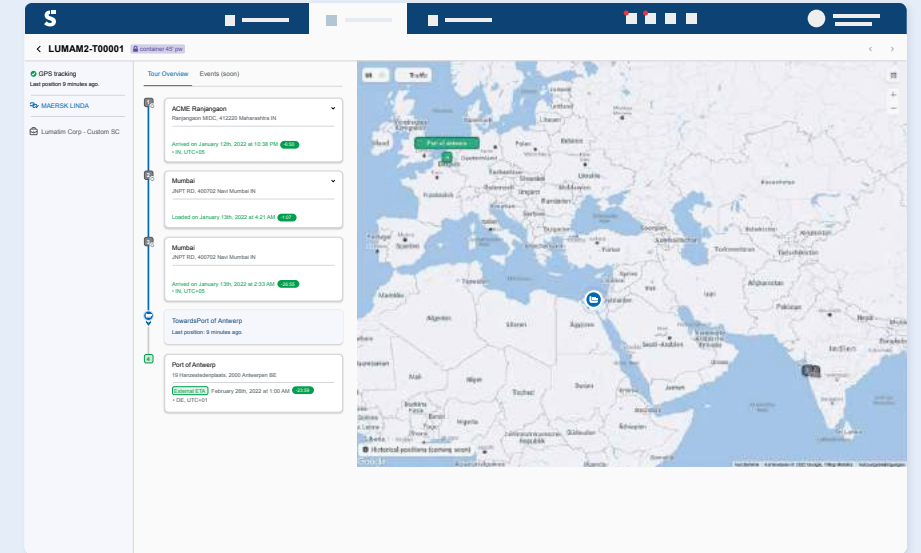

5

INTERMODAL VISIBILITY

Shippeo's platform aggregates data from multiple sources and presents it in a single portal.

Give management, distributors and customers visibility across a container's end-to-end journey with highly accurate intermodal shipment ETAs.

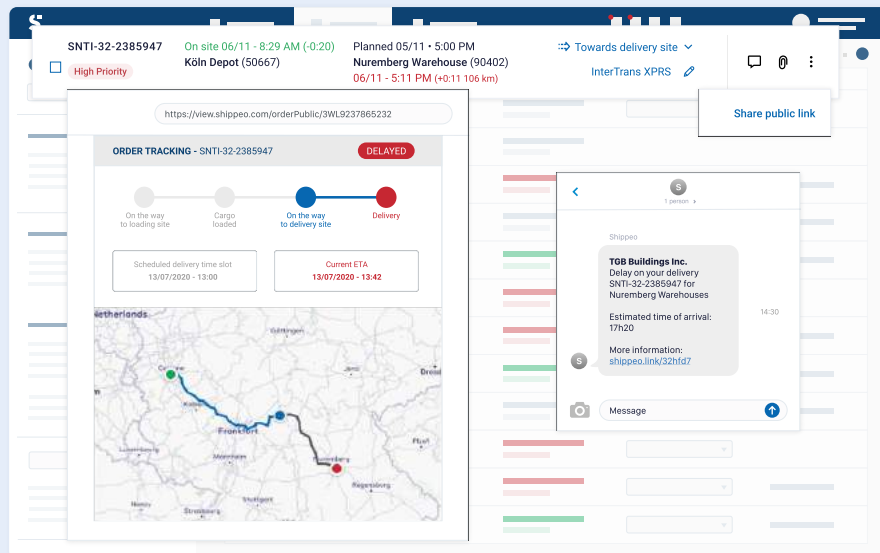

4

CUSTOMER VISIBILITY

Communicate to all parties via a white-labelled portal and notifications

Shippeo helps you improve customer satisfaction and optimize team collaboration by letting your internal users and your customers know well in advance the real-time status and predictive ETA of their deliveries.

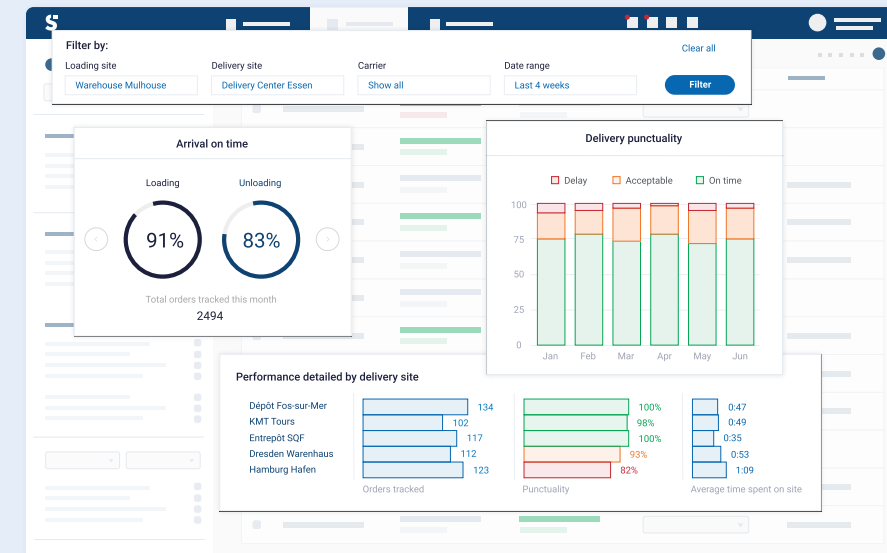

6

SHIPPEO INSIGHTS

Improve operations using intelligent dashboards and reporting

Monitor tracking rates, data quality, adherence and usage across all supply chain transportation, with automatic calculation of performance KPIs such as volumes, punctuality, average delays and dwell times. Create scorecards per carrier, supplier or site, analyze tracking rate problem root causes with our Smart Tracking Analyzer™, and export insights data to conduct historical analysis and forecasting.
